CONFIRMATION ORDER

Please carry out the following

Travel to site, remove failed brake booster and inspect. Booster clamp and body heavily rusted, voiding rebuild suitably.

Travel to various suppliers including volvo, multi spares, truck line trying to source a booster to suit

Bought new metric yoke to enable fitment of new booster and travelled back to site at

Fitted new booster, air pressure would not build up in the parking brake circuit. Troubleshoot circuit, suspect rusted service brake priority check valve.

When revs are held at high idle for an extended period, brakes will release. Operator said truck has been like that since it was on site.

Brake booster, new item to suit volvo front axle assy

[REDACTED] Volvo [REDACTED] Watercart was delivered from [REDACTED] to the above yard. We are unable to drive it to your workshop due to lack og clutch & difficulty in starting. If possible please could a mechanic attend the yard and carry out enough repairs to be able to drive the unit to your workshop for a service & repair. A new master cylinder was fitted to the clutch at [REDACTED] there is a cable under the passenger door which is attached to the cold start system. The truck is parked against the fence on the right hand side as you drive into the yard past the diesel pumps. [REDACTED] as to the progress of repairs, if able to drive to your yard perhaps one of your drivers would be willing to do that for me.
